

Since ACI FMA's establishment in 1955, it has been our commitment to work responsibly to benefit our members while implementing, protecting, and developing our three core values: Membership, Education, and Ethical Conduct.

With these purposes in mind, it is with great satisfaction that ACI FMA is presenting the new Education videos that will reinforce the detailed work that has been developed in this particular area and that ACI FMA is very proud of. For almost 7 decades, ACI FMA has been representative of a challenging industry and, step-by-step has built a strong global Association and is fulfilling its mission.

Kim Winding Larsen, President

The mission of our Board of Education is to design, deliver and support an Education program for financial markets that is a standard of competence in the industry. Our Education program has been substantially developed in the last couple of years and we firmly believe that ACI FMA is the right entity to assist market participants all over the world to enhance their knowledge and competence levels.

Rui Correia, Chair of Board of Education
